

Fireworks Ordinances & Laws:

Which Fireworks are Legal in Michigan?

For the purpose of most fireworks ordinances, sparklers and low-impact fireworks (those that don't explode and/or leave the ground) are permitted. However, always be sure to check the language of your local fireworks ordinance or call your local law enforcement agency to confirm what is allowed.

In addition, be aware that more severe penalties may be imposed if fireworks are discharged while under the influence of drugs and/or alcohol.
